

ch.innovazion.automaton.  
StateHierarchy.resolvePath

```
graph LR; A[ch.innovazion.automaton.StateHierarchy.resolvePath] --> B[ch.innovazion.automaton.StateHierarchy.decomposePath]; A --> C[ch.innovazion.automaton.StateHierarchy.normalizeIdentifier];
```

The diagram illustrates a method call sequence. A source box on the left, labeled 'ch.innovazion.automaton.StateHierarchy.resolvePath', has two blue arrows pointing to two destination boxes on the right. The top destination box is labeled 'ch.innovazion.automaton.StateHierarchy.decomposePath' and the bottom destination box is labeled 'ch.innovazion.automaton.StateHierarchy.normalizeIdentifier'.
